Short Courses - Hygienic design of food processing
plants
Programme for 2015

Cape Town 10-11 February 2015
Johannesburg 21-22 April 2015

Hygienic design is essential to Food Safety but is not just about Food Safety – properly designed buildings and equipment will save on downtimes for cleaning and will bring about reductions in water and energy consumption and in waste disposal
Click here for more information and registration.

A delegate to a recent course in hygienic design said in an e-mail –
"The recent course was possibly the best course I have ever been on – thank you for this"
