

NEWS UPDATE - FEBRUARY 2013 ISSUE

South Africa's premier Food Science and Technology publication

fst

South African Food Science and Technology

Coming soon in **fst**'s February 2013 issue:

Coming soon!

- Food labelling – what comes now?
- Allergen precautionary labelling
- African plant extracts and their commercial potential
- Stevia and low-calorie reduction
- The life cycle impacts of milk
- Mapping out new territories for texture
- Gelatine's renaissance
- Red meat research strategy in South Africa
- Smoking solutions
- Revolutionary drying technology
- Sensory wheels for South African herbal teas

The official magazine for members of the South African Association for Food Science and Technology (SAAFoST).

- local scientific articles that reflect the diverse research taking place in South Africa today
- articles and papers of interest from company principals and scientists
- summaries of these or published research by post-graduate students
- SAAFoST branch events and news
- extracts from international scientific publications, journals and magazines
- a diary of local and international food-industry events and conferences
- updates on food legislation
- industry trends and innovations.

Celebrating our first anniversary

ADVERTISE
