

Dear SAAFoST Northern Branch Members,

The Sabbatical Seminar afternoon you were informed about last Friday is being extended threefold as Branch events for 2014 get off to a flying start.

Two visiting researchers who are participating in the Australia Africa Universities Network Workshop at the University of Pretoria have kindly agreed to address Members. They will do so after Prof Taylor's presentation.

The visitors are:

Professor Kolawole Olumuyiwa Falade, Professor of Food Technology at the University of Ibadan, Nigeria.

He will talk on the, " Development of a coconut flavoured infant formula from cereals supplemented with protein isolate using response surface methodology".

Starting time about 16:25

Sri Lankan Professor, Vijay Jayasena, School of Public Health, Curtin University, Australia.

Presentation title: "Development of novel healthy foods to address some of the major world health issues".

Starting time about 16:50

The only changes to the notice and event detail in the circular below are that Prof Taylor's sabbatical seminar in Australia was actually presented in September 2013 (and not 2014!) and that this triple presentation session on Thursday will end a little later with refreshments at about 17:20.

It is going to be hard to miss isn't it!?

Regards,

Northern Branch Committee
