

Dear Members and Colleagues,

Let's face it.

In about as much time as it would take to phone forty to fifty suppliers, you could be meeting them in person at the SAAFoST Congress Exhibition.

Isn't it nice to know that the companies listed below have made time, expertise, literature and samples available and will be ready and waiting for you?

The exhibition is the equivalent of a parallel session, so, if there is nothing of specific interest to you on the lecture programme at any given time, pop into the exhibition and do some scouting around. It is a good, quiet time to interact or even to make an appointment with a chosen supplier.

Almost every exhibitor has something of value to offer you - your challenge is to find out what that is.

To be properly inquisitive and suitably rewarded, you might need to spend an average of about thirty minutes at every stand.

And much longer at the stands where you strike gold.

That's at least six hours per day!

Which is rather a heavy demand on time and with a full scientific programme and a foyer full of posters to contend with, some advance planning is advisable.

What better plan than starting to make contact with exhibitors right away and following up in person at the Exhibition for further information, literature or samples?

Following, to encourage and assist you, is a list of all confirmed exhibitors to date, complete with a brief intro to the business plus contact names and numbers.

Let your SAAFoST Exhibition start today!

Regards

OJF

Owen Frisby
