Annual Financial Statements for the year ended 31 December 2018

Accounting Policies

1. Basis of preparation and summary of significant accounting policies

The annual financial statements have been prepared on historic cost basis, except for certain financial instruments which are carried at fair value, and incorporate the principle accounting policies set out below. They are presented in South African Rands.

These accounting policies are consistent with the previous period.

1.1 Property, plant and equipment (CSIR Office)

Property, plant and equipment (CSIR Office) are tangible assets which the association holds for its own use or for rental to others and which are expected to be used for more than one period.

Property, plant and equipment (CSIR Office) is initially measured at cost.

Depreciation is charged to write off the cost of the asset over its expected useful life. The depreciation charge for each period is recognised in profit or loss unless it is included in the carrying amount of another asset.

The useful lives of items of property, plant and equipment (csir office) have been assessed as follows:

Item	Depreciation method	Average useful life
Furniture and fixtures	Straight line	5 years
IT equipment	Straight line	3 years

1.2 Financial instruments

Initial recognition

The Association classifies financial instruments, or the component parts, on initial recognition as a financial asset, a financial liability or equity instrument in accordance with the substance of the contractual arrangement.

Financial assets and financial liabilities are recognised on the Association's balance sheet when the Association becomes party to the contractual provisions of the instrument.

Fair value determination

The fair values of quoted investments are based on current bid prices.

Trade and other receivables

Trade receivables are measured at cost. Appropriate allowances for estimated irrecoverable amounts are recognised in profit or loss where there is objective evidence that the asset is impaired.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement with operating expenses. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against operating expenses in the income statement.

Trade and other payables

Trade payables are measured at cost.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand. These are initially and subsequently recorded at fair value.

Financial assets at fair value through profit or loss

The South African Association for Food Science & Technology

(Registration number: 013-075)

Annual Financial Statements for the year ended 31 December 2018

Accounting Policies

1.2 Financial instruments (continued)

Investments are measured initially and subsequently at fair value, gains and losses arising from changes in fair value are included in profit or loss for the period.

1.3 Revenue

Membership fees and workshop fees are measured at the fair value of the consideration received or receivable and represents the amount receivable for services provided in the normal course of business, net of value added tax.

Interest is recognised, in profit or loss, using the effective interest rate method.

Revenue from management fees is recognised and accounted for as such in the year of receipt.
